13:25 Workshop resumes.

3. Slideshow of McConnell River Bird Sanctuary.

David- Welcomes Joe Manik, is here to talk about the Kuugaryuk history and how it all began. It started in May of 1960, people of Arviat were really happy and excited, eager to start establishing a MBS. (9) University students from Ottawa arrived and used a type of equipment and conducted researched on geese eggs of their growth until they hatched. It is a very important area as there is many wildlife and wildlife habitat including many different types of bird. At the time, there were no polar bear nor wolves located around the area.

4. Committee Members brainstorming the importance and special activities about McConnell River to Arviat and why it should be considered a protected area. Also listed (23) different type of birds and (13) different types of wildlife in the area. See attached.

5. APMC Terminology Glossary

Committee members reviewing the Inuktitut terminology and making corrections and additions according to their community dialect. See attached.

6. Participants Manual

Leena reviewing the participant's manual and summarizing the Modules from 1 to 5 "Introductory Topics" with the Committee Members. Question & Answer Period.

7. Workshop ends at 15:00 hours.
